- **Phone:** [+381 62 1466 224](tel:+381621466224) (Serbia)

Summary

Full-stack developer with **5 years of experience** building scalable web applications. I specialize in Vue.js, Nuxt.js, Node.js, and Bun ecosystems.

Experienced in developing architecture from scratch, integrating APIs, and optimizing performance (Lighthouse 90+).

Leveraging AI-driven tools (Copilot, Ollama) to enhance code quality and delivery speed.

Technical skills

- **Frontend:** Vue.js (composition/options), Nuxt.js, Pinia, TanStack Query, TypeScript, Vite, Zod, Tailwind CSS, Telegram Mini Apps.
- **Backend:** Node.js, Bun, ElysiaJS, RabbitMQ, PostgreSQL, Redis, Drizzle ORM, Prisma, REST API, tRPC, WebSockets.
- **Testing:** Vitest, Playwright, Unit Testing, E2E Testing.
- **DevOps & Cloud:** Docker, S3, Git, CI/CD, Linux, Vercel, Cloudflare, Caddy Server.
- **AI & Tools:** GitHub Copilot, Prompt Engineering, Ollama.
- **Design:** UI/UX (Figma), responsive & semantic markup, accessibility.

Work experience

Support for existing customers

January 2026 – present

- I have assembled a suite of tools for monitoring ongoing projects, based on Sentry, Uptime Kuma, Rybbit, and custom automated tests tailored to each individual project. Set up a notification system via Telegram and email.
- БН website has been improved, and an AI agent has been added to quickly evaluate me as a specialist

Fullstack Developer — Anyone.fr (France, Remote)

October 2025 — January 2026

- **Digital Signature System:** Launched a microservice transforming Markdown contract templates between actors and agencies into legally binding PDF contracts. Implemented dynamic variable substitution, metadata embedding, and automated synchronization of signed documents with the database. Built interaction API and SPA for contract management.
- **Social Media Data Aggregators:** Created a multi-account web scraper using Playwright to automate collection of current data from Instagram and LinkedIn about casting opportunities for actors.
- **Project Integration:** Integrated newly created services into the existing project.
- **Marketplace Functionality Support:** Improved codebase quality by refactoring AI-generated code of key platform features, including user registration process on Vue.js 3, Nuxt, and TypeScript.

Fullstack Developer / Team Lead — AdsHoreca (Georgia, Remote)

November 2021 — October 2025

- **Infrastructure & CI/CD:** Configured deployment pipelines based on Dokploy, ensuring stable delivery across multiple branches and testing before production release.
 - **Application Delivery:** Developed 20+ high-performance web applications (Lighthouse 90+) and optimized SEO strategies.
 - **Engineering Leadership:** Led small teams of developers and designers on some projects. Implemented code quality standards through mentoring and **code reviews**.
 - **Real-Time Solutions:** Built real-time camera streaming system for glamping using Cloudflare Workers and KV storage.
 - **Reliability:** Built data synchronization system between booking services, internal database, and S3 storage.
 - **Quality Assurance:** Implemented E2E testing with Playwright, reducing critical production bugs by 30%.
 - Integrated third-party services (Calltouch, analytics) for lead collection and marketing data visualization.
-

Freelance Developer / Designer

July 2020 — November 2021

- Started career with UI/UX design and frontend development for small businesses.
- Created landing pages and marketing websites
- Integrated third-party services (Calltouch, analytics) for lead capture and marketing data visualization.

Certifications

- **Vue.js Certified Developer** — [View Certificate](#)

Education

Chelyabinsk State University (May 2020) - Graphic Design

Additional information

- **Legal Tech Experience:** Prior career in government procurement and contract management, enabling effective translation of legal/business requirements into technical specifications.
- **Processes:** I take a comprehensive approach: from security and privacy policy configuration to SEO optimization and JSON-LD markup.
- **Soft Skills:** Experience in direct communication with clients, decomposition of business tasks into technical requirements, mentoring junior developers.
- **Languages:** Russian (Native), English (Professional Working Proficiency).
